

My Prophecies

Summer 2024

- The **Montreal Expos** will re-enter Major League Baseball, playing in a new stadium located in the former Blue Bonnets Raceway site. They will be in a division with the Toronto Blue Jays, Boston Red Sox and New York Yankees!
- Racquetball will be in the **2024 Paris Summer Olympics** featuring in excess of 150 countries from at least 6 continents. In the natural, this is impossible. Racquetball is in its lowest phase in over 40 years - near extinction on the racquet sport map. Less countries are playing the sport and with the exception of the Latin American countries, participation numbers are down everywhere and court facilities are closing/being transformed for other uses.

July 1, 2025

Inside of one week it will be seen by in excess of 1 billion people across the world, all free of charge, making it the biggest screenplay in history ([Avatar](#))! The series will feature new movies/shows at regular intervals as Ross and his pioneering group travel the world, the 1500 levels of New Jerusalem (each of which being 1500 square miles) as well as this universe and the infinite number of parallel universes - and report back to a world waiting to see and hear of their journeys.
- My Book, [Come Away With Me](#), will be published by a company, Blurb, which Jeff Bezos has purchased and he will distribute copies to every person who wants one, all across the world, free of charge, through Amazon!
- **Doug** - The Movie - will open and will instantly become the number one sports movie/drama/documentary/biopic of all time - by a landslide. Telling the entire story of the life of the Greatest Athlete of All Time, Doug Harvey.

This represents an abbreviated version of my prophecies. I see great changes for the world in every area. Most importantly is that we will transcend from this world to a place where there is no form of currency and where everything is available to every person, free of charge and in the quantity necessary, simply because they are on of God's greatest and most prized creations. I call this place Heaven on Earth - and that is precisely what it is!
